

FS140
Oil-Wood
Hot Air
Furnace

Save your energy, fuel your choices!

If you're considering an oil furnace, consider the benefits of a Benjamin oil-wood combination. You'll enjoy the high efficiency of oil and the option of burning wood only when it's convenient – without sacrificing efficiency. Give yourself the luxury of alternating between fuel sources with a unit that requires no more floor space than a standard oil furnace. Plus, with proper installation, the unique one-piece design makes this an extremely effective gravity-fed unit in case of power failure.

Features:

- Up to 85.4% efficient on oil
- Convenient, separate fireboxes for oil and wood
- Wood chamber located on top for easy loading
- Three top-mounted cleanouts for easy cleaning
- Extra large firebox accepts up to 24" logs

*Comfort...
Enjoy!*

6 Year
Limited
Warranty

WK400
Combustion Controlled
Wood Furnace

Homeowners who heat with wood appreciate the comfort and convenience of the Benjamin **WK400**. Our innovative tubular design ensures reliable, efficient burning that lets you make the most of your heating dollar.

Features:

- Three top-mounted cleanouts for easy cleaning
- Compact size saves valuable floor space
- Certified for use as a stand-alone or add-on furnace
- Designed for installation on either side of an existing warm air furnace
- Extra large firebox accepts up to 29¹/₃" logs
- Round firebox eliminates the need for firebrick

*Comfort...
Enjoy!*

6 Year
Limited
Warranty

Benjamin Heating

The innovative leader in home heating solutions.

BOILERS

SINCE 1972 BENJAMIN HEATING PRODUCTS of Springhill, Nova Scotia, has provided customers with high performance furnaces and boilers for superior home comfort. Whether you choose to burn wood, oil or a combination of both, you'll find Benjamin Heating Products offers maximum efficiency and convenience.

We continually strive to adapt our products to your changing needs. Innovations in our hot water products – compact design, Dutch Oven concept and wet-leg feature – increase efficiency and give you the flexibility you want. Our hot air products incorporate a tubular aerodynamic design that reduces footprint while maintaining maximum efficiency.

IF YOU'RE IN THE MARKET FOR HOME COMFORT, CALL US.

From its 49,500 square foot, state-of-the-art manufacturing plant in Springhill, Nova Scotia, Benjamin Heating Products produces a comprehensive line of top quality oil and wood fired home-heating appliances.

CC500
Oil-Wood Hot
Water Boiler

Save your energy, fuel your choices!

Enjoy the best of both worlds – the efficiency of an oil boiler and the savings of wood heat – with a unit that requires no more floor space than a standard oil boiler. Rely on oil when you're away from home and burn wood on weekends, evenings or whenever it's convenient. You choose! And whatever fuel you use, you can count on innovations like our Dutch Oven design to protect against overheating while maximizing efficiency.

*Comfort...
Enjoy!*

Features:

- Up to 85.4% efficient on oil
- With proper installation, may be operated as gravity-fed unit in case of power failure
- Convenient, separate fireboxes for oil and wood
- Wood chamber located on top for easy loading
- Extra large firebox accepts up to 23 1/4" logs
- Compact design saves valuable floor space, requires less piping for easy installation
- Equipped with two domestic hot water coils

When you buy a Benjamin Heating Product, you have decades of experience behind you and years of trouble-free operation ahead of you. That's what we call comfort. Decades of experience, and a wealth of satisfied customers, tell us we're right.

DO110/180
Wood-Fired
Boilers

Features:

- Designed for use as an add-on to the primary heating source
- Compact size saves valuable floor space
- Extra large firebox accepts up to 23 1/4" (DO110) or 35" (DO180) logs
- Equipped with domestic hot water coil

Constructed with Benjamin's Dutch Oven concept, our wood-fired boilers combine safety, efficiency and

durability, with the cost-savings of wood heat. The firebox is completely surrounded with cooling water to maximize heat absorption and prevent damage from overheating. With proper installation, these boilers can be operated as gravity-fed units in case of power failure.

Comfort... Enjoy!

OB1000/OB2000
High Efficiency
Oil-Fired
Boilers

Ensure a steady supply of heat and hot water for your home with our durable, efficient oil-fired boilers. Our wet-leg design provides an extended surface area of water – from the top to the bottom

Features:

- Equipped with top-of-the-line burners for maximum efficiency, reduced heating costs and lower emissions
- Operates at up to 87% efficiency
- Front- and rear-mounted fittings provide placement options
- Compact size saves valuable floor space
- Available with or without domestic hot water coil
- Extended output range:
OB1000 – 90,000 - 176,000 btu
OB2000 – 213,000 - 328,000 btu
With Balanced Flue Venting System:
OB1000 – 91,000 - 153,600 btu

of the unit. This design protects from overheating and more than doubles the absorption area of conventional dry-base boilers, assuring adequate output to meet your family's heating needs.

*Comfort...
Enjoy!*
